

Product Manager

– m/f/d – Full time –

We are an international software company based in Dresden that develops **innovative SaaS solutions for agriculture**. Our mission is to revolutionize efficiency, productivity, and sustainability in agriculture worldwide through intelligent, internet-based software.

We are looking for a Software Product Manager, to strengthen our dynamic team. In this role, you will shape our digital products from vision to delivery. You assume end-to-end responsibility for the entire product lifecycle, ensuring that our solutions meet company goals and optimally serve evolving customer needs.

Your tasks

- Developing and communicating a compelling product vision and defining the Product Roadmap, based on market analysis, competitive benchmarks, and company goals.
- Prioritizing product features, balancing stakeholder input against user experience and technical feasibility. Creating detailed Product Requirements.
- Steering and coordinating the entire product development process (Ideation, Engineering, Design, Marketing, Sales). Ensuring timely and high-quality releases.
- Monitoring industry trends and competitors to develop market-driven pricing models.

Your profile

- Proven experience as a Software Product Manager in a technology-driven company.
- Background in software development, project management, or product marketing.
- Excellent communication, analytical, and leadership skills.
- Fluent in German and English.
- Knowledge of the Ag-Tech domain is a significant advantage.

What we offer

- The opportunity to significantly influence cutting-edge software in the Ag-Tech sector.
- A collaborative and international team culture.
- Flexible working in a modern office in Dresden.
- Professional development opportunities.
- Competitive salary and benefits.

Apply now and simply send your application, including your salary expectations, to Kristin by email!
